---

## FRONT-END DEVELOPER

## Portfolio Website

Frontend Developer skilled in HTML, CSS, JavaScript, and React. I focused on building responsive, user-centric interfaces and delivering quality code.

---

## PROFESSIONAL EXPERIENCE

### Cherry Media

Jul 2023 – Jul 2024

#### Graphic Designer

I helped them create their portfolio website, ensuring a professional and visually appealing design. Incorporating modern design trends and user-friendly layouts.

Additionally, I crafted multiple layouts, tailored to meet their clients' unique needs and preferences. Each design was optimized for responsiveness, providing a seamless experience across all devices.

---

## MY PROJECTS

### Url Shortener

LIVE

A simple and efficient URL shortener that converts long URLs into short, easily shareable links. I used **React** and **Tailwind** to build this project and used **MongoDB** to store URLs. Faced some issues like **CORS** and solved them patiently and logically.

### Weather App

LIVE

A **user-friendly** weather application that provides weather updates for any location. The app is designed for accuracy, **responsiveness**, and a seamless user experience. Features like weather by city name, **7-day weather forecast** with daily temperature trends, etc. Used third-party **API** for fetching data.

### Airbnb Clone App

LIVE

A full-stack Airbnb clone that allows users to browse, search, and book accommodations. The platform provides a **seamless experience** for both guests and hosts, with features similar to Airbnb. I executed the fronted part and the connection between the frontend and the backend. Made with **React** and **Tailwind**.

### Password Generator

LIVE

A Javascript-based password generator to showcase my understanding of **JavaScript**. Features like adding special characters, and numbers to the password make it more **unique** and **strong**. Added **copy-to-clipboard** feature for more user friendly.

### Tips Calculator

LIVE

A tips calculator that helps users quickly determine the **tip amount** and total bill based on the entered bill value and tip percentage. Designed for ease of use with a clean and **responsive UI**.

---

## EDUCATION & CERTIFICATIONS

### Bachelor of Commerce

2022 - 2025

Frontend Development - Udemy
